

Take The Hotsy Detergent Challenge!

Are you paying for water instead of detergents?

Give us 15 minutes of your time to take the Hotsy Detergent Challenge

If we can lower your detergent expense and maintain or improve your washing results, would you be interested in using Hotsy detergents?

Your local Hotsy dealer can perform an evaluation of your current detergent usage. We compare detergents in an “apples to apples” visual way, and not strictly on a price per gallon assessment, utilizing these four important tools:

- Water Hardness Test Strips
- pH Test Strips
- Water Softener
- Flow Meter

Not all detergents are made to the same strength. Usually detergents with “low ball” pricing have been diluted with water to achieve the low price. We find that in nine out of ten cases, companies are using more detergent than necessary to get the job done. Contact us today and take the Hotsy Detergent Challenge! Let us show you how to save money and time with Hotsy detergents.

Hotsy is the #1 Name in North America for High-Pressure Cleaning Equipment. That's why you can trust Hotsy detergents - they are formulated specifically for use with hot and cold water pressure washers.

Nothing Cleans Like a Hotsy!

Hotsy Detergents Provide Cleaning Solutions

- **Most effective cleaning** - Unlike so-called "economy" products, Hotsy detergents are designed specifically for high-pressure, high-temperature cleaning. Hotsy detergents actually become more effective as temperatures increase. Inferior detergents begin to decompose under high temperature and pressure.

- **Economical operation** - Hotsy detergents are super concentrated. They're designed to blend with water in ratios up to 150 parts of water to 1 part of detergent. Compare that to economy brands and you'll see why Hotsy detergents go a long way, and keep operating costs low. Hotsy also gives you a choice of economical ways to buy detergents, from 5-gallon pails to 55-gallon drums to Bulk Packs that provide up to 125 to 200 gallons of on-site storage, depending on your needs.

- **Preserves your equipment investment** - Using inferior "economy" detergents allows lime and hard water deposits to build up inside of pipes and system components in hard-water environments. The result is reduced performance and energy efficiency, higher maintenance costs and shorter equipment life.

Most Hotsy detergents contain exclusive Hotsy Continuous Clean (HCC) additives, which help prevent lime and soap buildup. In addition, they contain corrosion inhibitors that not only help protect the internal parts of your equipment, but also help protect metal surfaces of the equipment being cleaned.

- **Environmentally friendly** - You can use Hotsy detergents with complete confidence. They have no unpleasant odors, and they're biodegradable, so they're safe for the environment as well. Most are USDA and Canadian Food Inspection approved. OSHA Material Safety Data Sheets are available on all Hotsy detergents.

- **Local Specialist** - Your local Hotsy dealer will recommend the best detergent to solve your toughest cleaning problem.

Choosing Hotsy equipment and Detergents is a smart choice

- **You Get the Whole Package:** Hotsy equipment, detergents, preventative maintenance program, warranty, water softener, professional installation, customer support and, of course, trained technical service.
- **Formulated for hot water and cold water pressure washers**
- **Resident Hotsy Chemical Engineer**
- **Kosher Approved**
- **Rocky Mountain Poison Control Center Number Listed on all labels**
- **Chem-Trec Listed Number - In case of a spill or leak**
- **DOT Approved Containers**
- **Material Data Safety Sheets supplied with on all detergents**
- **Hotsy detergents are free of fillers**
- **Hotsy detergents are highly concentrated** and can be metered at higher dilutions ratios than other detergents, which means lower cost to the user.
